

Bringing exemplary MBB service to Evian Royal Palace

- Built in 1909 for King Edward VII, Evian Royal Palace is one of France's premium hotels
- Host to Presidents, World Leaders and premium events such as the G8 summit – excellent MBB coverage is essential
- Compatibility with the building architecture and sympathy with the hotel design had been a key challenge for previous candidate solutions

The Solution

- **Huawei LampSite** was easily deployed within the 1909 architecture with the novel pRRU design complimenting the hotel's contemporary interior
- SFR delivered MBB throughout the hotel achieving average data rates of 110Mbps

Evian Royal Palace experiencing exemplary MBB service & contemporary design from SFR & Huawei LampSite
