

OpenCell provide multi-operator 5 Bar coverage

The Hotel was suffering from poor ground floor coverage and no coverage in the fantastic conference facilities and large ballroom. They had been trying for several years to solve the problem and had considered a multi-operator DAS system and also a repeater system.

In May 2016 OpenCell deployed a Femtocell solution connected to the OpenCell network management system which monitors and enables fault diagnostics and repair.

The result is that The Hilton Bankside now has excellent 5 bar service throughout their bars, restaurant, executive lounge, ballroom, conference areas, meetings rooms and also the gymnasium and spa areas.

Hilton Hotel London gets 5 bar coverage for all operators with OpenCell
