

Delivering 5 Bar Coverage for 5 Star Resort

Vodafone Spain successfully deployed the Ericsson Radio Dot System at the Lopesan Baobab Resort in Meloneras, the south region of Gran Canaria, Spain (Grand Canary Islands)

- High performing indoor 3G and 4G coverage and capacity throughout resort enabled by the Radio Dot System
- Improved efficiency and performance through centralized radio access network (CRAN) configuration, shared between 3G and 4G Dots
- Higher end-user data rates (up to 35 Mbps for indoor 4G)
- Full integration with outdoor 3G macro network

Increased mobile performance from small cells in the hotel connects guests with their family, friends, and work while abroad
