

Modernizing wireless service in Philadelphia

- Installed 37 new small cell nodes around the historic Benjamin Franklin Parkway
- Design, approval, fiber and equipment installation, testing, and calibration all completed in less than nine months
- Each piece of infrastructure needed to be fully utilized as a shared solution across multiple carriers
- Nearly 900,000 people greeted the pope when he arrived in Philadelphia
- One carrier reported over 12.6 terabytes of data usage on their network – almost 7.5 times as much as they reported for 2015's biggest NFL game
- Partnering with 6 city agencies and 3 carriers

Crown Castle partners with 6 city agencies and 3 carriers to prepare Philadelphia's wireless for Pope's visit
