

Driving Performance at lower OPEX at Jakarta Airport

“We see Ericsson’s solution as the right fit in our commitment to continuously improving the mobile service experience for our customers.”

Dian Siswarini
President Director, XL Axiata

- Micro Radios in open areas and Radio Dot System at gates, with common baseband
- Project management, design, implementation and tuning services from Ericsson
- Network throughput has shown a 3X increase
- Delivering a flexible architecture that leverages a common baseband, fully integrated within the existing network and on the path to 5G

XL Axiata boosts Jakarta airport's network throughput by 3x with Ericsson common baseband small cells
