

Innovative Technology Cost-effectively Reimagines Challenges of the Digital Divide to Deliver High Speed Wireless Broadband and Voice to Canada's Arctic Communities

ANY backhaul

- Eliminates backhaul challenge
- Utilizes any current (satellite) or future (fiber) backhaul

Instant Deployment

- Middle of Arctic winter (-55 to -60 ° F (-48 to -51 ° C) and sunset at 2PM
- sites **went up within a few days** -- just plug backhaul and power
- real-time SON on HetNet Gateway (HNG) automated all configuration and optimization parameters

SDR/compact RAN hw

- Can be deployed on any street furniture or existing towers and rooftops; delivered to remote sites on skidoos
- No additional cabinet is required.
- Single integrated solution for 3G and 4G/LTE (and 5G in the future) that delivers the smallest site footprint

Ice Wireless Deploys Parallel Wireless to Connect the Unconnected Canadians with unlimited data plans
